

End Family Fire Live Announcer Copy

:60

We do all that we can to protect our families and make sure they're safe. But having a gun in the home that is improperly stored actually puts our children at greater risk. In fact, 4.6 million children live in homes with guns that are unlocked and loaded. That's right. 4.6 million children.

Additionally, 8 kids and teens are unintentionally injured or killed in our country every day by Family Fire - a shooting involving an improperly stored or misused gun in the home. But we can prevent this.

At End Family Fire.org you can find actionable information on safe gun storage, and how to avoid tragedy in your family. Let's all make sure we are truly protecting the ones we love.

Learn how to make your home safer at End Family Fire.org. Together, we can End Family Fire.

Brought to you by the Ad Council and End Family Fire.
